

The Ray Kerns of Flint Co. project:

Special thanks to the Ray Kerns beauty supplies and Equipment Company for giving us the opportunity to retrofit their warehouse and showroom to that of LED lighting from the old large long 8ft T12 tubes, and assisting them with the Consumers Energy rebate refund program. We removed the old magnetic ballast and covers, replacing them with Mobern Lighting LED ready covers, brackets holders for new tombstones. Fixtures was then paired with TOPSTAR Lighting LED 18Watt Bypass Series tubes.

Another professional installation completed by **Chapman Power Systems, LLC.**
