

UV-B, BL & BLB

Special Coated Low Pressure Lamps

USHIO offers 3 types of special coated Low Pressure lamps: UV-B, BL, and BLB. These lamps are each coated with special blended phosphor to emit radiation peaking at 306nm (UV-B), 352nm (BL) or 368nm (BL & BLB).

The UV radiation emitted at specific wavelengths are used to create UV reaction and effects for various applications such as in Laboratory/Research, Industrial, Sanitation, Criminology, Cosmetics and Entertainment.

Manufacturing at an ISO9001 certified facility with tightly controlled manufacturing process, enables us to provide high quality lamps with reliable delivery to support your OEM product development as well as your daily operation.

These lamps are components which may be used by customers to manufacture a variety of finished products.

FEATURES & BENEFITS

- 3 Wavelength Variations: 306nm(UV-B), 352nm (UV-A) or 368nm(UV-A)
- Specially Blended Phosphor Coating for Maximum UV Effect and Output
- Low Mercury Dose to Meet Environmental Demands
- Large Production Capacity Providing Lamps With Consistent Quality and Reliable Delivery
- Flexible Design Capability for Custom Lamp Development

APPLICATIONS

- UV Curing
- Detection
- Inspection
- Insect Luring
- Photochemistry
- Chromatography
- Phototherapy
- Dermatology
- Laboratory/Research
- Fluorescence Analysis
- Fluorescence Display
- Fluorescence Illumination
- Non-Destructive Testing
- Special Effects in Theatrical Presentation

Average lamp life and output measurements taken under laboratory conditions in open air. Lamps are cycled for 2 hours and 45 minutes on / 15 minutes off when testing life and output. Lamp data is for reference only. Actual lamp performance depends on system design and operating conditions.

WARNING: Protect your eyes and skin when operating UV-B & BL lamps. Equipment should be designed to completely screen or filter UV radiation.
